SUMMARY

Third-year Software Engineering student with a strong foundation in **software development, backend systems, and relational databases**. Experienced in building full-stack applications involving **real-time systems, AI-powered features, authentication, and microservices** through team-based academic projects. Seeking a Software Engineering Internship to further develop **problem-solving and engineering skills** through real-world product development.

EDUCATION

VNU-HCM University of Science (HCMUS)

Third-year Student - Bachelor of Science in Software Engineering (Expected 2027)

Oct 2023 – Present

Ho Chi Minh City, Vietnam

- GPA: 8.67/10.00

HONORS & AWARDS

Top 8 Team, Viettel AI Race 2026 – Qualifying Round

Aug 2026

Bronze Medalist, HCMUS CTF 2026 (Promising Division)

Jun 2026

PROJECTS

Doccommunity

Oct 2025 – Jan 2026

Teamwork project (5 members) – Fullstack Developer

github.com/wukairo/Doccommunity

Technologies Used: React, Spring Boot, PostgreSQL, Spring WebSockets, OpenRouter API, Docker, JWT

- **Description:** A **real-time collaborative Markdown document platform** integrated with context-aware AI assistants and a community sharing feed.
- Integrated **OpenRouter API** to deliver advanced AI capabilities, including a **context-aware document chatbot**, text refinement/summarization, and an intelligent auto-tagging system.
- Engineered a high-concurrency real-time collaboration engine using **Spring WebSockets** and the **diff-match-patch algorithm** to support patch-based synchronization, live cursor tracking, and version control.
- Implemented a robust **Role-Based Access Control (RBAC)** system (Owner, Editor, Viewer, Commenter) secured via **Spring Security** and JWT access/refresh tokens.
- Developed a markdown editor with side-by-side preview and autosave, built a public community feed, and containerized the full-stack system using Docker Compose.

Online Auction

Oct 2025 – Dec 2025

Teamwork project (2 members) – Fullstack Developer

github.com/AkiraTomori/Online-Auction

Technologies Used: Node.js, Express.js, Handlebars, PostgreSQL, Knex.js

- **Description:** A comprehensive e-commerce auction platform with concurrent bidding workflows, post-auction management, user watchlists, and role-based access control.
- Built a **multimodal AI Listing Copilot** through **OpenRouter** to analyze product images and seller notes, generate **structured listing drafts**, and validate outputs before publication.
- Implemented a **grounded AI Buyer Assistant** that converts **natural-language requests** into allowlisted **PostgreSQL search filters** and returns verifiable, database-backed auction recommendations.
- Engineered a **transaction-safe bidding engine** with bid-step validation and automatic extension, alongside cron-based expiration processing and event-driven email notifications.
- Designed a relational **PostgreSQL schema with Full-Text Search** and implemented session authentication, OTP, reCAPTCHA, and Supabase Storage integration.

Comic Reader

Mar 2026 – Jun 2026

Teamwork project (5 members) – Fullstack Developer

github.com/wukairo/ComicReader

Technologies Used: Java 21, Spring Boot, Android (Java/MVVM), Python/FastAPI, Docker, PostgreSQL, Firebase, ONNX

- **Description:** A **full-stack comic reading platform** with an Android client, a Spring Boot REST API, and two Python/FastAPI AI microservices.
- Architected the **microservices system**, orchestrated via **Docker Compose** with multi-profile configuration.
- Built an end-to-end **manga translation pipeline** (speech-bubble detection with **RT-DETR v2/ONNX**, OCR via MangaOCR and PPOCRv5, inpainting, and translation) delivered through an **asynchronous job-polling API**.
- Implemented **JWT and Google OAuth2 authentication** with **role-based authorization**, plus a weekly automated sync from an external API using rate-limiting and isolated transactions.
- Engineered the Android app with **MVVM**, **Room** offline cache, **Retrofit2/OkHttp**, and **WorkManager** for background chapter downloads.

SKILLS

Programming Languages: Java, JavaScript, C++, TypeScript

Backend: Spring Boot, Spring Data JPA, Spring Security, Spring WebSockets, Node.js, Express.js

Frontend: Angular, React, Handlebars, Bootstrap, HTML, CSS

Databases: PostgreSQL, MySQL, SQL Server

Testing: JUnit, Mockito, Unit Testing

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

Architecture & Concepts: Layered Architecture, Microservices, Design Patterns, SDLC, Agile

Languages: English: IELTS 6.0 (CEFR B2)
